

Alejandra's Electric Extravaganza

Alejandra loves to watch television and play video games just like other children her age. However, Alejandra has a life-threatening medical condition that makes her feel very ill at times. When that happens, Alejandra loves to watch television and use it as an escape. When wishgranters from the Make-A-Wish Foundation® of North Texas asked Alejandra what her one, true wish was, she knew exactly what she wanted! Alejandra wished for a new entertainment system to help her keep her mind off the medicine.

Alejandra started brainstorming about what she wished for. She knew that a new television was at the top of her list. She also knew she wanted a few other items to go with her television. The more things to entertain her while lying in bed, the better she would feel!

Alejandra's wishgranters put together a fantastic set of electronics to make for the wish. One morning, Alejandra awoke to find her living room full of boxes. She eagerly began to open each one of them. First, she found a big-screen plasma television. Her eyes lit up! She was so thrilled! Alejandra then saw a DVD/VCR player, Xbox system, television stand, and 200 dollars worth of gift cards so she could purchase anything else she needed. Her media room was complete and her wish had come true!

Alejandra really enjoyed putting her media room together. She was able to forget about doctors and medicines, and had the opportunity to concentrate on herself. She had a lot of ownership in designing the media room and selecting the electronics that went inside it. Many people said that they have never seen Alejandra as happy as she is in her media room!! The electronics she received will be a constant reminder to persevere through her condition, even when times are tough. Alejandra's wish brought her and her family some much needed hope, strength, and joy.

Alejandra's wish was generously supported by the
Irving Police Association
